Professional Summary

Computer Engineering student (2027) and Full-Stack Developer with hands-on experience in the **MERN stack and Java ecosystem**, including **Spring Boot, Spring Security, and Spring AI**. Experienced in building RESTful applications, secure backend systems, and AI-powered platforms using LLMs, machine learning, and computer vision. Strong foundation in DSA, OOP, and software development, with experience developing and deploying end-to-end applications.
‘‘‘latex

Technical Skills

Languages:	Java, C, C++, Python, JavaScript
MERN Stack:	MongoDB, Express.js, React.js, Node.js
Java Backend:	Spring Boot, Spring Security, Spring AI, REST APIs, JWT, GitHub OAuth
Frontend:	Next.js, Three.js, HTML5, CSS3, Canvas API
Databases & Tools:	MySQL, Git, GitHub, VS Code, Render
AI, ML & CV:	Gemini, Groq, OpenAI, LLM Integration, MediaPipe, WebAssembly
Core CSE:	Data Structures & Algorithms, OOP, AST Parsing, System Design, Agile, SDLC

Experience

Cisco — AI Intern June – August 2026 Certificate
NetSage AI – AI-Powered Network Troubleshooting Assistant Live Demo

- Developed an AI-assisted network troubleshooting platform for Cisco Packet Tracer labs, analyzing network symptoms, topology details, and diagnostic command outputs.
- Integrated AI-powered diagnosis to identify root causes, OSI layers, confidence scores, recommended diagnostic commands, and actionable fixes with human-in-the-loop review.

BSNL — Government Data Analytics Intern February 2026 Certificate GitHub
Telecom Data Analytics – Network Quality & Revenue Optimization

- Analyzed 10,000+ simulated telecom records using Python, Pandas, and NumPy, identifying a 0.7 correlation between QoS degradation and ARPU loss.
- Applied Scikit-learn linear regression to model revenue risks and developed Power BI dashboards, projecting INR 2 Lakhs/month in at-risk regional revenue.

Projects

GYAN.AI — AI-Powered Technical Notes & Knowledge Platform Live Demo

- Built a full-stack platform using React, Node.js, Express, and MongoDB to transform YouTube lectures and technical topics into structured study notes.
- Integrated Gemini and Groq LLMs with automated fallback, timestamp-based transcript chunking, React Flow knowledge graphs, customizable study modes, JWT authentication, and PDF/DOCX/Markdown exports.

ShadowPlay — Real-Time Hand Gesture & Shadow Puppet Studio Live Demo

- Developed a browser-based shadow puppet platform using React, MediaPipe Hands, WebAssembly, and Canvas API, enabling real-time gesture recognition through 21 hand landmarks.
- Engineered interactive 3D theatre interfaces and game modes, implementing privacy-first client-side processing with Node.js, Express, MongoDB, and secure APIs.

Repo City — 3D Codebase Visualization & AI Learning Platform Live Demo

- Built a React, Three.js, Node.js, Express, and MongoDB platform transforming Git repositories into interactive 3D cities, visualizing file structures, dependencies, complexity, and commits.
- Engineered multi-language AST parsing, dependency graph analysis, DAG algorithms, concurrent processing, and an AI learning studio with Gemini/OpenAI, SSE, GitHub OAuth 2.0, and generated quizzes.

Education

2023–2027 **B.Tech in Computer Engineering**, Shri Ram Institute of Technology **GPA: 8.2/10**
2022 **Class XII**, MP Board **75%**

Achievements & Certifications

Smart India Hackathon '25 – National Runner-up, among top 40 finalist teams. 2025
Hack SRIT '24 & Technogenesis '24 – Top 30 Finalist. 2024
AWS Academy Machine Learning Foundations Aug 2026
AWS Academy ML for Natural Language Processing Jul 2026
AWS Academy Cloud Foundations 2025
Introduction to Java – SoloLearn Apr 2024
